Bagela USA Tours Factory in Germany & Participates in their 25th Anniversary Celebration!

Alan Thompson, Dave Brennan & Greg Harla traveled to Germany to celebrate Bagela's 25th Anniversary. We spent several days meeting with management, engineering and manufacturing to discuss many topics, share ideas and gather answers on existing and future product offerings. The trip was a great success and we would like to share some of what we learned with you!

Highlights of the Trip

- BUSA visits factory and makes progress toward future US programs to support dealers & end users.
- Factory and BUSA representatives participated in joint work session that will lead to recycler enhancements. Some of the enhancements that are under consideration include:
 - BA10000 CS: A new burner has been added so that regulations may be met in strict compliance areas, including the State of California.
 - BA10000 DI: Supplements such as light oil rejuvenation can now be introduced at the final stage of the recycling process with the direct injection port added to the rear of the drum.
- Factory and BUSA work session will lead to worldwide sharing and release of additional emissions documents.
- Factory announces its support and participation in the 1st Bagela USA User conference.
- Bagela USA extends an offer to factory reps to tour US installations in the 2nd half of 2009.

GOING GREEN

As the cover story of this newsletter reflects, recently I spent some time in Germany visiting the factory. While I was there, I witnessed a true sense of what going green was all about. Resources are considered a premium, and the mindset is not to waste them.

Whether electricity, water or even air, there is something in place to be sure citizens (and visitors) were receiving maximum benefit with minimal waste. It is easy to now understand why this was the "birthplace" of the Bagela Asphalt Recycler. Almost 20 years ago, there was a need to do something with leftover chunks and millings- hence the Recycler was "born!"

We in the United States have benefited from over 15 years of continuous improvements, capabilities and refinements. Today, for the first time ever in the United States, there are stocking dealers and a nationwide network established. All of this is to support existing users as well as new customers who see the "green" in going green. Here's to another 25 years!

Alan's Technical Tips

Alan Thompson

Want to get more life out of your Drum Roller, Drive Chain & Teeth?

Keep them wet and clean! These components are in direct contact with the hot drum and the result is the lubrication is being baked off. As the grease is heated, the oil separates and flows away leaving the base, packing the bearings and seizing the rollers. The same happens to the chain, causing premature wear, loss of pitch and then loss of teeth.

I recommend 2 shots of grease every 8 hrs in the rollers and replenish grease on chain as required to keep it wet. Every couple hundred hours, scrape the buildup off the roller faces and path on the drum to maintain a smooth running surface. These simple steps will ensure many hours of trouble-free operation.

Remember: Bagela USA can automatically send a recommended filter kit to you every 3 months to ensure optimal performance. Call Bagela USA for details.

Parts: Bagela USA has outsourced the warehousing and shipping of our parts inventory.

We partnered with 3PL Worldwide in Milford, Connecticut to warehouse, process and ship all incoming wholesale and retail parts orders. This will greatly simplify our processes and provide outstanding customer service by shipping parts on a timely basis to our dealers and customers.

All Major Credit Cards Now Accepted!

Based on trade-show, advertising and website response, interest in Bagela Asphalt Recyclers has never been greater! We can create a financing package for municipal or private users that will suit your needs in these challenging economic times!

The American Recovery and Reinvestment Act of 2009 has officially extended the Section 179 deduction increases initially made available in the Economic Stimulus Act of 2008. This has been extended through December 31, 2009.

Bagela USA is here to serve those who wish to save and make Green \$\$\$ with the Bagela Asphalt Recycler!

HERE WE GROW AGAIN!

The “pushpin” map above shows the locations of Bagela Asphalt Recyclers currently operating throughout the United States. Bagela USA has received many inquiries from all over the United States and Puerto Rico! Most recently, we have delivered or are about to deliver Recyclers as far south as Baton Rouge, LA and as far north as Kotzebue, Alaska!

Local News:

- Connecticut limits the use of cold patch from May 1 to Sept 30. Due to extensive VOx emissions produced during the production of cold patch, the State of Connecticut no longer allows cold patch to be used as a temporary fix for road surfaces.
- Connecticut approves the use of hot mix recycled asphalt on state projects. The State of Connecticut approved recycled hot mix asphalt to be used as a temporary patch for state road surfaces.
- Firm in Hartford, CT conducts independent research and determines Bagela Asphalt recycler is exempt from State and Federal EPA regulations. Bagela USA has this information, please contact us for copies!
